In 1856, Giuseppe Sambonet, a Fine Arts graduate and the son of a nobleman from Vercelli, obtained his warrant as Master Goldsmith and established the company, Giuseppe Sambonet, depositing his seal bearing the initials "GS" at the Turin mint.

At the beginning of the twentieth century his company was the official purveyor to many nobles, including the Duchess of Genoa and the Count of Turin.

Always in step with the times, Sambonet has stood out for its progressive spirit in the production field. It is the first in Italy to have a system capable to add to a massive silverware the electroplating process.

Already by 1938, Sambonet started developing sophisticated industrial technologies to produce stainless steel, making its way to the silver plating process.

In 1947, it started producing stainless steel knives and blades using its own technology. It conquered the international market in 1956, by being chosen – among 53 competitors – to supply the Cairo Hilton Hotel with a hollowware line that is still in its collection today. This marked the beginning of the company's great tradition of supplying world-class hotels and restaurants.

Starting from the Sixties, Sambonet began a series of collaborations that would have lead to collections that affirm and spread the company's focus on design.

Roberto Sambonet, in particular, created collections of primary importance, such as the "Pesciera", the "Center line" and "Linea 50" trays that can be admired at the MoMA in New York.

From Compasso d'Oro ADI obtained in 1994 with Hannah flatware to Good Design and Wallpaper Design Award for Gio Ponti collections, and Good Design of Sphera coffee line, there are a lot of projects that shine in the international panorama design.

From 1997 the brand is part of an important Italian group that realizes professional kitchen tools with Paderno and Arthur Krupp and refined porcelains with Rosenthal, Thomas, Hutschenreuther and Arzberg.

The Group has also recently reinforced his presence in the luxury world with the acquisition of the French brands Ercuis and Raynaud.

Nel 1856 Giuseppe Sambonet, figlio di un nobiluomo di Vercelli, ha ottenuto – dopo il diploma di Belle Arti – il brevetto di Maestro Orefice e ha costituito la ditta Giuseppe Sambonet, depositando presso la zecca di Torino il punzone con le iniziali "GS". Agli inizi del Novecento la società da lui fondata è stata fornitrice ufficiale di molti nobili, tra cui la Duchessa di Genova ed il Conte di Torino.

Al passo con i tempi in ogni epoca, Sambonet si è distinta per lo spirito evolutivo della propria produzione realizzando, per prima in Italia, un impianto capace di affiancare all'argenteria massiccia quella galvanica.

Già dal 1938, infatti, ha iniziato a mettere a punto sofisticate tecnologie industriali di lavorazione dell'acciaio inossidabile, arrivando all'argentatura dello stesso.

Nel 1947 ha inoltre intrapreso, con tecnologia propria, la produzione di coltelli e lame in acciaio inox. La conquista del mercato internazionale risale al 1956, quando si è aggiudicata – prima su 53 concorrenti – la commessa per l'Hotel Hilton al Cairo, con una linea di vasellame ancora oggi in collezione.

Ha inizio così la grande tradizione di forniture per alberghi e ristoranti stellati di tutto il mondo. A partire dagli anni '60, Sambonet ha avviato un percorso di collaborazioni che avrebbe portato alla nascita di collezioni orientate al design. Roberto Sambonet, in particolare, ha creato collezioni di primaria importanza, come la "Pesciera", il "Center line" e i vassoi "Linea 50", oggi in collezione al MoMA di New York.

Dal Compasso d'Oro ADI ottenuto nel 1994 con la posata Hannah al Good Design e al Wallpaper Design Award per le linee Gio Ponti, passando per il Good Design assegnato a Sphera Holloware, molti sono i progetti che si distinguono nel panorama internazionale del design.

Dal 1997 il brand fa parte del gruppo Sambonet Paderno Industrie che, alla sua produzione, unisce articoli per la cucina professionale con Paderno e Arthur Krupp e raffinatissime porcellane con Rosenthal, Thomas, Hutschenreuther e Arzberg. Il Gruppo ha recentemente rafforzato la sua presenza nel settore del lusso con l'acquisizione dei brand francesi Ercuis e Raynaud.

electroplated nickel silver

CLASSIC EPNS

The absolute purity of the silver, certification requirements of the stainless steel and nickel silver are what constitute Sambonet's quality silver production.

In respect to the traditional plating, the exclusive technique HSP Hard Sambonet Silverplating applied to the products, offers longer durability and resistance to the coating.

The silver plating, done entirely by Sambonet, was developed and perfected over the years thanks to a unique automated galvanic electroplating cycle.

On an international level, the department is now distinguished for size and modernity.

Always in step with the times, Sambonet has stood out for its progressive spirit in the production field. It is the first in Italy to have a system capable to add to a massive silverware the electroplating process.

Already by 1938, Sambonet started developing sophisticated industrial technologies to produce stainless steel, making its way to the silver plating process.

All articles are subject to a rigid manual quality check, ensuring excellent work on all finishings and adding to their top notch esthetic design.

Sambonet's silver production is made up of AISI 304 stainless steel or nickel silver, alloy made up of 66% copper, 13% nickel and 21% zinc, embellished with pure silver.

La purezza assoluta dell'argento, i requisiti certificati dell'acciaio e dell'alpacca sono alla base della qualità della produzione argentata Sambonet. Rispetto all'argentatura tradizionale, l'esclusiva tecnica HSP Hard Sambonet Silverplating applicata ai prodotti offre maggior durezza e resistenza al rivestimento.

L'argentatura realizzata internamente è stata sviluppata e finalizzata negli anni grazie a un singolare ciclo di elettrodeposizione galvanica automatizzato.

A livello internazionale il reparto si distingue oggi per dimensioni e modernità.

Al passo con i tempi in ogni epoca, Sambonet si è distinta per lo spirito evolutivo della propria produzione realizzando, per prima in Italia, un impianto capace di affiancare all'argenteria massiccia quella galvanica.

Già dal 1938, infatti, iniziò a mettere a punto sofisticate tecnologie industriali di lavorazione dell'acciaio inossidabile, arrivando all'argentatura dello stesso.

Tutti gli articoli sono soggetti a un rigido e scrupoloso controllo qualità manuale, che ne assicura l'ottima esecuzione della finitura e che concorre alla resa estetica d'altissimo pregio degli stessi.

La produzione argentata Sambonet trae origine da acciaio inox AISI 304 o alpacca, lega costituita da rame al 66%, nickel al 13% e zinco al 21%, impreziositi con argento puro.

FINISHES

Sambonet increases its flatware collections with new refined finishes, in order to offer the widest range of choice and customization possibilities. The Vintage finish is obtained through a series of industrial processes and mechanically produced finishings. PVD, on the other hand, is made by the implementing of metallic particles through vaporization. Both techniques act on the flatware surfaces, creating a "used" effect or refined nuances of color. Even the antique and satin processing follow a similar method, with manual workmanship and a high pressure sandblasting treatment.

flatware

Sambonet dona alla sua gamma di posateria raffinate finiture, che spaziano dalla texture al colore, per offrire la più ampia possibilità di scelta e di personalizzazione. Se la finitura Vintage si ottiene tramite una serie di processi industriali e lavorazioni meccaniche di finitura, il PVD è realizzato invece tramite la deposizione di particelle metalliche mediante vaporizzazione. Entrambe le tecniche agiscono sullo strato superficiale delle posate, conferendo nel primo caso l'effetto "usurato" e nel secondo pregiate sfumature di colore. Anche le lavorazioni antique e satin seguono processi di questo tipo, prevedendo lavorazioni manuali e trattamenti di sabbiature ad alta pressione.

POLISHED

PVD (Physical Vapour Deposition) is a technique which colors and shades valuable objects by evaporating metal particles in a vacuum chamber. This special treatment is welded at an atomic level to the surface of the stainless steel flatware, hardening the steel and optimizing its resistance to both rubbing and corrosion, as well as preventing rust and oxides from forming.

Il PVD (Physical Vapour Deposition) è un processo che conferisce agli oggetti pregiate colorazioni e sfumature, ottenuto tramite la deposizione di particelle metalliche mediante vaporizzazione in una camera sottovuoto. Questo particolare rivestimento si salda a livello atomico alla superficie in acciaio inox delle posate, dotando il materiale di maggiore durezza e di resistenza sia all'usura per sfregamento che alla corrosione, inibendo la formazione di ruggini e ossidi.

DESIGN SPHERA

The purity of Rosenthal's fine bone china is mixed with the hardness of Sambonet's stainless steel, creating a perfect new match. The Jade Sphera collection, with its soft and sinuous forms, can be perfectly paired with Sambonet's Sphera collection, recalling its award-winning design. Different materials, same form: the one to adorn the tables of the most refined hotels.

Il candore della fine bone china di Rosenthal si mescola alla rigidità dell'acciaio di Sambonet dando vita a un connubio perfetto. La collezione Jade Sphera, con le sue forme morbide e sinuose, è perfettamente abbinabile all'omonima collezione Sphera di Sambonet, richiamando il suo pluripremiato design. Materiali diversi, stessa forma: quella per le tavole degli hotel più raffinati.

DESIGN PVD FINISH

holloware

PVD (Physical Vapour Deposition) is a technique which colors and shades valuable objects by evaporating metal particles in a vacuum chamber. This special treatment is welded at an atomic level to the surface of the stainless steel flatware, hardening the steel and optimizing its resistance to both rubbing and corrosion, keeping the materials foodsafe.

Il PVD (Physical Vapour Deposition) è un processo che conferisce agli oggetti pregiate colorazioni e sfumature, ottenuto tramite la deposizione di particelle metalliche mediante vaporizzazione in una camera sottovuoto. Questo particolare rivestimento si salda a livello atomico al substrato in acciaio inox, dotando il materiale di maggiore durezza e resistenza sia all'usura per sfregamento che alla corrosione, mantenendo l'idoneità al contatto con gli alimenti.

DESIGN LINEA Q

Refined, innovative and timeless design characterizes Sambonet style. This entire concept plays with square and rectangular forms made up of interchanging edges and curves. With this line, inspired by minimalism and the surfaces of stainless steel, an extension of articles are introduced using new materials like bamboo. A mixture of cornstarch, coloring, resin and bamboo fibers suitable for contact with food.

Un design raffinato, innovativo e senza tempo che connota lo stile Sambonet. L'intero concept gioca con le forme quadrate e rettangolari, caratterizzate da un alternarsi di spigoli e linee arrotondate. In questa collezione improntata al minimalismo e alla matericità conferita dall'acciaio si affianca un'estensione realizzata con nuovi materiali come il bamboo: una miscela di amido di mais, colorante, resine e fibre di bamboo, idonea al contatto con il cibo.

DESIGN GIO PONTI - DOMUS

Gio Ponti's projects – revisited by Sambonet after sixty years – and the Domus candelabra bring modernity to the table, proving that true works of art are still able to communicate contemporaneity unchanged over time. The centerpiece with its perfect symmetry and the tray of stainless steel bent leaf, together with the candelabra and its four 360 degree rotating arms are objects in which “Made in Italy”, design and luxury come together in a masterful fashion.

I progetti di Gio Ponti – rivisitati da Sambonet dopo sessant'anni – e il candelabro Domus portano in tavola la contemporaneità che solo le opere d'arte riescono a comunicare inalterata nel tempo. Il centrotavola con la sua perfetta simmetria e il vassoio con un unico foglio di acciaio inox piegato su se stesso, insieme al candelabro con le sue quattro braccia che ruotano di 360°, sono oggetti in cui made in Italy, design e lusso si coniugano in maniera magistrale.

Characteristics

An exclusive pressing process and valuable raw materials grant Contour a harmonious and exclusive design.

Materials

Nickel-Silver: copper 66%, nickel 13% and zinc 21% (CuNi12Zn24), stainless steel AISI 304 (EN X5CrNi18-10), brass and copper.

Details

Thickness varies from 1,5 to 2 mm, up to 5 mm at the points most exposed to shocks and strain. Trays' edge, made of pressed copper, is welded with Sambonet patented special process.

One piece hinges are molded and the holes gauged to assure sharp work; 145° revolving covers. The especially shaped spout ensures excellent pouring.

**The respect
for the environment
and for the people
is a relevant issue
for Sambonet Paderno
Industrie corporate
responsibility.**

Il rispetto dell'ambiente
e della persona sono temi
rilevanti all'interno
della responsabilità
d'impresa di Sambonet
Paderno Industrie.

The commitment to sustainable growth on which the Group was founded has been maintained and permits both to guarantee adequate working conditions in order to satisfy the changing needs of the staff and to apply solutions aimed at reducing the environmental impact. From this perspective, the management of energy, electricity and water consumption focuses on:

- **the use of electrical energy: clean, renewable and in harmony with the environment;**
- **the use of methane as the sole fuel source;**
- **the use of ground water for the manufacturing process, to be fully purified before being released into the environment;**
- **the use of an advanced energy-saving technology.**

Il Gruppo ha impostato e sviluppa tutt'oggi la propria evoluzione con un impegno di crescita sostenibile garantendo condizioni lavorative che possano soddisfare i bisogni delle persone nei differenti momenti della loro vita aziendale e applicando soluzioni volte a diminuire l'impronta ecologica. In quest'ottica, la gestione dei consumi energetici, elettrici e idrici è orientata a:

- impiegare energia elettrica pulita e rinnovabile;
- utilizzare il metano come unica fonte di combustibile;
- servirsi, per la produzione, di acqua di falda da restituire all'ambiente completamente depurata;
- usare tecnologia di risparmio energetico avanzata.

SUSTAINABILITY REPORT

**Sambonet Paderno
Industrie strives
to implement forms
of measurement to assess
the punctuality,
the transparency
and the efforts
made for sustainable
development.**

Sambonet Paderno Industrie lavora per attuare forme di misurazione che siano in grado di documentare la puntualità, la trasparenza e l'impegno messo in atto per uno sviluppo sostenibile.

This has led to the preparation of the corporate charter of principles: 10 principles, 10 commitments, on which the Company builds its industrial future from a perspective based on preventive approach and stewardship.

UNI EN ISO 50001:2011

The voluntary compliance with this standard demonstrates the company's commitment and vision towards responsible energy consumption, factoring in both the economic hope of reducing consumption and, above all, the desire to increase environmental awareness about reducing greenhouse gas emissions.

UNI EN ISO 14001:2004

The environmental certification is the recognition that the environmental policy results in a continuous improvement of environmental performance by minimising the negative impact of its operations on the environment.

OHSAS 18001:2007

The safety certification has the objective of protecting the safety of the workplace and the health of workers. Sambonet Paderno Industrie is the first Italian company in its sector that has obtained this certification.

SR10:2011

The implementation of this management system confirms the company's commitment to the promotion of responsibility and accountability of their actions toward their stakeholders, in accordance with their interests and in consideration of the legal principles and protection of human rights. Employees, customers, suppliers and local communities and organizations become the beneficiary of the concrete impact of company decisions sharing and of the disclosure of the information linked to its activities.

Da qui la creazione della propria carta dei principi: 10 principi, 10 impegni su cui, attraverso un approccio preventivo e una gestione responsabile, l'Azienda costruisce il proprio futuro industriale.

UNI EN ISO 50001:2011

L'adesione volontaria a questa norma testimonia l'impegno e la visione dell'azienda verso l'ottimizzazione del consumo responsabile dell'energia, sia in termini economici auspicando a una riduzione dei consumi, e soprattutto verso una crescente attenzione ambientale diminuendo le emissioni di gas serra.

UNI EN ISO 14001:2004

La certificazione ambientale garantisce i risultati di una politica ambientale volta al continuo miglioramento delle proprie performance minimizzando ogni impatto negativo delle sue attività verso l'ambiente.

OHSAS 18001:2007

La certificazione ha l'obiettivo di tutelare la sicurezza e la salute dei propri lavoratori e dell'ambiente lavorativo. Sambonet Paderno Industrie è la prima azienda appartenente al settore metalmeccanico ad ottenere l'attestazione.

SR10:2011

L'implementazione di questo sistema di gestione conferma l'impegno dell'azienda verso la promozione della responsabilità e della rendicontazione del proprio operato verso gli stakeholder, nel rispetto dei loro interessi e in considerazione dei principi di legalità e tutela dei diritti umani. Dipendenti, clienti, fornitori, comunità locali e associazioni sul territorio diventano così i destinatari della condivisione dell'impatto concreto delle decisioni aziendali e della divulgazione delle informazioni legate alle sue attività.

CERTIFICATIONS

UNI EN ISO 22000

Sambonet Paderno Industrie is the first company in its industry that has been awarded the EN UNI ISO 22000:2005 certification. This certification attests to the highest international standard both for the Group and for the whole food and beverage industry.

The implementation of its requirements, along with the implementation of HACCP (Hazard Analysis and Critical Control Points, a hygiene system that prevents contamination hazards), ensures the provision of a safe and impeccable service to customers by meticulously and scrupulously assessing the hygienic and safety conditions of activities and products. This is a guarantee not only for HoReCa professionals, but also, and foremost, for final consumers.

UNI EN ISO 9001:2008

This quality certification ensures compliance with the requirements of the international UNI EN ISO 9001:2008 standard, which guarantees the production and sale of quality products that fully meet customers' needs and expectations.

NSF

GOST

Some products by Sambonet Paderno Industrie have been awarded the Russian certification GOST (GOST R) by the Federal Agency for Technical Regulation and Metrology (aka GOSSTANDART), attesting to the compliance with the standards applied on the Russian market. The acronym GOST stands for "Gosudarstvennyj Standard", which means "State Standard" in Russian.

AEO

In 2008 Sambonet Paderno Industrie obtained the AEO Certification for Customs Simplifications and Security and Safety, valid for the EU. This programme provides a framework for governing customs regulations, guaranteeing that the company provides a reliable and secure service within the international supply chain. In addition, in 2011, Sambonet Paderno Industrie obtained the mutual recognition of the AEO programme with the Japanese customs administration, thus further improving customs relations with Japan.

KNOWN CONSIGNOR

The "Known Consignor" approval issued by ENAC (Italian Civil Aviation Authority) certifies that the company is an originator of cargo suitable for carriage on any aircraft, in compliance with common safety procedures and provisions.

ECCELLENZA 2006

This prestigious certificate of Excellence, awarded by Certiquality to Sambonet Paderno Industrie for the implementation of an integrated Quality, Environmental and Safety management system, has been granted only to few companies in Italy that have obtained the ISO 9001, ISO 14001 and BS OHSAS 18001 certifications.

AWARD FOR EXCELLENCE

In 2006 Sambonet Paderno Industrie received the Award for Excellence for Innovation by Confindustria (the main organization representing Italian manufacturing and services companies) with reference to the framework for innovation of the EFQM-European Foundation for Quality Management.

UNI EN ISO 22000

Prima nel suo settore, Sambonet Paderno Industrie ha ottenuto la certificazione EN UNI ISO 22000:2005. Così come per l'intero comparto food and beverage, anche per il Gruppo la UNI EN ISO 22000:2005 rappresenta lo standard di più alto livello su scala internazionale. L'applicazione dei suoi requisiti, congiuntamente all'applicazione dell'HACCP (Hazard Analysis and Critical Control Points, sistema di autocontrollo igienico che previene i pericoli di contaminazione), garantisce alla clientela un servizio sicuro ed impeccabile attraverso una valutazione puntuale e scrupolosa delle condizioni igieniche e sanitarie delle attività e dei prodotti. Una garanzia di tutela non solo per il personale del canale professionale ma anche, e soprattutto, per il consumatore finale.

UNI EN ISO 9001:2008

La certificazione di qualità conforme ai requisiti della normativa internazionale garantisce la produzione e la commercializzazione di prodotti di qualità, che soddisfino pienamente i requisiti e le aspettative del cliente.

NSF

La certificazione è stata conseguita per alcuni prodotti grazie al superamento delle rigorose norme applicate negli USA circa i materiali a contatto con gli alimenti. Il marchio NSF (National Sanitation Foundation) è sinonimo di garanzia per i costruttori, ispettori ed utilizzatori.

GOST

La certificazione russa GOST (GOST R.), riconosciuta dall'Agenzia Federale per la Tecnica e la Metrologia GOSSTANDART per alcuni articoli, garantisce la conformità di tali prodotti rispetto agli standard applicati dal mercato russo. La sigla GOST è un'abbreviazione di "Gosudarstvennyj Standard" che in russo significa "Standard di Stato".

AEO

La certificazione comunitaria AEO Semplificazioni doganali e Sicurezza, conseguita nel 2008, garantisce un'attività disciplinata della regolamentazione doganale dell'azienda qualificandola in fatto di affidabilità e sicurezza nella catena di approvvigionamento internazionale. Nel 2011, inoltre, Sambonet Paderno Industrie ha ottenuto il mutuo riconoscimento del programma AEO con l'amministrazione doganale giapponese, condizione che favorisce ulteriormente i rapporti con il paese.

MITTENTE CONOSCIUTO

LABORATORIO DI ANALISI
INTERNO CERTIFICATO

LAB N°1407

The items produced and sold by Sambonet Paderno Industrie not only comply with applicable regulations, but are also systematically tested.

The Company can guarantee the suitability and safety of its products as it has established a specific workgroup and the ASEC Lab (Alimentary Security Control) internal laboratory, which analyses the materials intended to come into contact with foodstuffs.

The laboratory is now accredited to carry out migration testing on steel, aluminum, porcelain, glass, plastic materials and coloring in order to issue declarations of compliance, recognized by both national and international governments. The ASEC Lab is also accredited to determine pH levels, solvents and metals in water discharge, a guarantee for the internal analysis of the wastewater quality.

Oltre alla conformità rispetto alle norme vigenti, gli articoli prodotti e commercializzati da Sambonet Paderno Industrie sono controllati in maniera sistematica.

Grazie alla costituzione di un gruppo di lavoro e del laboratorio interno ASEC Lab (Alimentary Security Control), specializzato nell'analisi di materiali destinati al contatto con gli alimenti, l'Azienda è in grado di garantire l'idoneità e la sicurezza dei propri prodotti.

Il laboratorio è oggi accreditato per realizzare test di migrazione su acciaio, alluminio, porcellana, vetro, materiali plastici e coloranti per il rilascio di dichiarazioni di conformità, riconosciute da qualsiasi ente nazionale e internazionale. ASEC Lab è inoltre accreditato per la determinazione di pH, solventi e metalli nelle acque discarico, una garanzia per le analisi interne sulla qualità delle proprie acque di scarico.
